

Virtual Instruction with EdOptions Academy

Your school or district has partnered with EdOptions Academy to give your student a quality virtual learning experience. We are excited for your partnership! Here are a few common questions guardians of virtual learners ask about EdOptions Academy.

What is EdOptions Academy?

EdOptions Academy is a leader in high-quality virtual learning. Our fully accredited virtual school offers students a fun and rewarding alternative learning experience. EdOptions Academy has partnered with schools, districts, and parents/guardians to deliver rigorous, research-based, online learning since 1997.

Trusted nationally by over 400 partner school districts, EdOptions Academy provides extensive and effective learning solutions to all types of learners. Our solution allows schools and districts to enhance, expand, and extend their program offerings.

What is virtual learning?

Virtual learning can be defined as using technology as a medium to deliver instruction, including teacher-facilitated instruction (where there is some distance in geography and or time between the teacher and student) and self-directed learning. It is not to be confused with the broader category of *digital learning*, which encompasses the general use of technology to support teaching and learning.

Who are EdOptions teachers?

Our teachers are master virtual educators with deep expertise in both traditional classroom instruction and virtual education. All EdOptions Academy teachers are high-qualified, state-certified instructors, and they are certified in virtual teaching and learning.

How do students receive instruction?

Our instructional model provides a balance of live lessons, one-to-one instruction, and independent practice designed to engage all learners.

Our teachers will:

- Guide students through the virtual experience
- Provide high quality live instruction
- Monitor student performance and progress
- Communicate frequently with students via email, phone calls, messenger, and Zoom
- Provide high quality grading and feedback aligned to the rubrics
- Collaborate with your district representatives

Your student will have access to our learning platforms to provide relevant content aligned to standards in a flexible environment for self-paced learning. Our platforms offer opportunities to demonstrate mastery through embedded assessments and include real-time data to monitor progress.

Finally, our teachers will offer your student access to recordings and resources that will give them the opportunity to front-load and review content. This encourages student agency and provides flexibility for self-paced learning.

How can I help my student succeed in virtual learning?

Reach out to your school or district representative to clarify expectations for your student's virtual learning experience.

Encourage your student to reach out to their teacher if they are struggling to understand concepts.

For technical issues, contact Edmentum Support at 800-447-5286 or support@edmentum.com

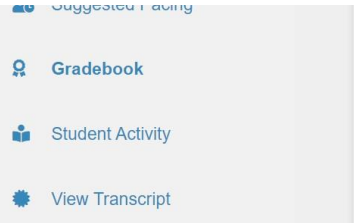

Encourage students to access live sessions and live help. Assist them with first time use of the learning platforms.

Support students with navigation, organization, and planning of their weekly schedule.

You and your student will receive an email with EdOptions logins from noreply@edoptionsacademy.com.
