

Directions: Cut out the sound boxes. Cut out the markers. Work one-on-one or with small groups of students. Each student has sound boxes and markers. Say words with from 2 to 4 sounds. Be sure to articulate clearly and stretch the sounds as you say the words. Students move a marker into each box for each sound they hear in a word. This list of words can get you started! You can also show pictures, have students name them, and then they can move the markers.

2 Sounds
